

Postgraduate Diploma In Orthodontics

CAMBRIDGE
DENTAL INSTITUTE

*This course is conducted and followed by the regulations and standards of the
Clinical Governance Directorate of the British Orthodontic Society, 2014

The opportunity with CDI Postgraduate Diploma in Orthodontics

Exponential change in socio-cultural, political and economic environments, rapid advances in technology, and a better understanding of the human brain are just some of the factors enhancing the value of future orthodontic practice.

These changes demand new thinking and new approaches to the way dental practice is applied and how it is learnt.

As well as creating greater career opportunities, these changes are having a positive impact in the field of orthodontics and alternative Dental treatment. For example, the number of people working as Dentist in United kingdom is expected to grow to 122,800 by 2023.*

Backed by 20 years of experience in teaching and research in orthodontics, CDI Postgraduate Diploma in orthodontics is designed to help dentists succeed in a complex world and deliver better patient service and community outcomes.

Who is this program for ?

The CDI Postgraduate Diploma in orthodontics is a contemporary and hands-on qualification that provides the knowledge and skills to understand modern orthodontic and reach your career goals.

The background image is a photograph of a classical stone archway. At the top center of the arch is a detailed sculpture of a lion's head, facing forward with its mouth open, showing its tongue. The arch is constructed from large, dark stone blocks, and the surrounding wall is made of reddish-brown bricks. The lighting is warm, highlighting the textures of the stone and brick.
